

IN THE CLAIMS

Please cancel the previous versions of the following claims and replace them with the following rewritten versions. Marked up copies showing the amendment since the previous versions are annexed as separate pages.

Claim 1 (amended). A dental impression or doubling composition, comprising

- A) alcoxysilyl-functional polyethers with linear or branched main chains with an average molecular weight (M_n) of 800 to 20,000, containing 20 to 95 percent of polyether groups and 0.2 to 25 percent of $\text{SiR}^1\text{R}^2\text{R}^3$ alcoxysilyl groups, in which R^1 , R^2 and R^3 , independently of one another, are hydrogen, alkyl or alkoxy, and 0 to 10 percent of urethane groups or 0 to 10 percent of urea groups, and
- B) a mixture, containing water and organic acids, inorganic acids or both in a ratio by weight of 1 : 0.01 to 1 : 40.

Claim 2 (amended). The dental impression or doubling composition of claim 1, wherein component A) has a branched main chain.

Claim 3 (amended). The dental impression or doubling composition of claim 1, wherein component A) is free of urethane groups.
